California Tuberculosis Update

- California lost its TB-Free status in September, 2008. California's status is now: 'Modified Accredited Advanced'
- Each state receiving California cattle may have different requirements, depending on factors such as sex, destination (grass or feedlot), etc.
- Please be aware of your state of destination's rules concerning receiving California cattle. Contact your local or state veterinarian's office for current rules.
- Please check with the representative of the cattle PRIOR to sale if the cattle need to be tested or ID'd for your state. WVM cannot guarantee consignor's willingness to TB test, provide Identification Tags for cattle or provide Premise ID Number unless stated in contract.
- **BUYER ALERT:**
California cattle will, by default, be sold as: ***WITHOUT*** a Tuberculosis (TB) test, premise ID and/or official individual animal identification ear tags ***UNLESS OTHERWISE STATED*** in the catalog or announced from the auction block.
